[Java & JEE , Spring, Hibernate and other trainings will be available on \[www.HadoopExam.com\]\(http://www.HadoopExam.com\)](#)

Question 1: In HDPCA, should I perform all the tasks manually, using command line or using Ambari UI?

Answer: It is your choice, in whatever way you feel comfortable you should solve the problem. They are just interested to check that, you have solved given problem scenario or not.

[Practice 57 HDPCA Problem Scenarios as well as HDP Administrator Hands-on Training with in depth concepts.](#)

Question 2: In HDPCA given task will have specific single thing/part?

Answer: It may be. But most probably you will be given tasks which required multiple steps to be accomplished. In a given tasks there could be multiple parts.

Question 3: I have completed all the required configurations, but service is not started properly. Will I get marks for this HDPCA tasks?

Answer: Yes, as far as you have done properly done required configuration than it should be considered complete solution. However, it is decided by evaluator.

Question 4: I have some specific question about my HDPCA exam, whom should I contact?

Answer: You can drop an email to certification@hortonworks.com

Question 5: In HDPCA exam, which all documentation will be accessible?

Answer: You can access below link, during your exam.

<http://hortonworks.com/training/certification/hdp-certified-developer-faq-page>

However, it is suggested you practice all the [Questions provided here](#). At least more than once, so it can save your lot of time.

Question 6: Are we allowed to use Google search engine during real HDPCA exam?

Answer: No, you are not allowed. You can access only documentation provided above.

Question 7: Do we have to configure services in HDPCA exam?

Answer: Yes, you might be asked to do basic configuration for any HDP service. However, main focus is installation. You might not be asked to very optimally configuring services like Kafka, Accumulo, Atlas, Slider or any other service.

[Practice 57 HDPCA Problem Scenarios as well as HDP Administrator Hands-on Training with in depth concepts.](#)

Question 8: Are there any possibility of getting question on setting property of services?

Answer: You may be asked to re-set existing property of a service or new property needs to be created. If you practice all the [57 scenarios given here](#), it would be very easy to solve given problem in HDPCA exam.

Question 9: Should I change the configuration of Service , while installation to make it optimal?

Answer: If they asked to change the property than you have to do. If it is not asked, let it be default.

Question 10: How to prepare for HDPCA certification?

Answer: You can practice [all 57 scenarios given here](#). If you are new or not comfortable with the HDP admin. <http://www.HadoopExam.com> soon launching an hands on training for BigData Administration. Please subscribe on website to get regular alert.

Question 11: Do we need to set up the OS as well in real HDPCA exam?

Answer: No, cluster will already minimally configured. So you don't need to install from scratch. However, having this experience will certainly helpful.

Question 12: Which OS will be given during exam?

Answer: It is linux OS.

Question 13: I have made the changes , but services are still under maintenance mode. Will this be considered as completed task?

Answer: No, once proper configuration is done. Service should start properly and should not be in maintenance mode.

Question 14: Should I prefer Ambari or command line?

Answer: You should prefer Ambari.

[Practice 57 HDPCA Problem Scenarios as well as HDP Administrator Hands-on Training with in depth concepts.](#)

Question 15: How do I know the fully qualified name of the node?

Answer: You should try either of the below command on linux terminal.

```
hostname -f
```

```
hostname -fqdn
```

Question 16: What, needs to be solved for configuring and managing alerts?

Answer: Change or enable new alerts with given parameters. [Refer practice Questions here](#)

Question 17: What kind of tasks will be asked under troubleshooting section?

Answer: You should be able to find logs of jobs and in the log you need to find real cause of Job failure.

Question 18: Which all checkpoint parameters, we need to remember or focus?

Answer:

fs.namenode.checkpoint.period – The number of seconds between two periodic checkpoints.
dfs.namenode.checkpoint.txns – The standby will create a checkpoint of the namespace every 'dfs.namenode.checkpoint.txns' transactions, regardless of whether 'dfs.namenode.checkpoint.period' has expired.

Thus a new checkpoint will be created if either the checkpoint period is reached or number of unchecked transactions has maxed out, whichever happens first.

Question 19: How to find NameNode is in safemode or not?

Answer: Use below command

```
hdfs dfsadmin -safemode get
```

Using below command, you can enter or come out the safemode of the NameNode

#Enter in safemode

```
hdfs dfsadmin -safemode enter
```

#Get the status

```
hdfs dfsadmin -safemode get
```

#Leave the safemode

```
hdfs dfsadmin -safemode leave
```

Question 20: Do, I have to create complete script for rack awareness?

Answer: You don't need to remember how to create script, but you need to be familiar with content and have skills in rack awareness configuration using Ambari.

Question 21: Should I create, HDP multi node cluster my own?

Answer: Yes, it is suggested. You should be able to create HDP cluster using plain Linux OS. Also able to configure basic OS requirement for creating HDP cluster.
